

# Phthalate Reporting Requirements

Reporting requirements for phthalates from the toy industry, RoHS, REACH, Prop 65, and medical device regulation continue to evolve. **We work hard to stay current with ever-evolving industry standards and provide transparent reporting that gives our customers the visibility they need to choose the best material for their application(s).**

alphagary

Polymer Solutions

We are often asked for non-phthalate or phthalate-free compounds so that customers can comply with reporting requirements. We realized, however, that these terms could be misleading if they don't accurately identify the reportable phthalate content in a compound.

In the spirit of transparency, we are publishing the below list which summarizes our understanding of the current reporting requirements. **And we are identifying compliant compounds by providing the statement: "This product is not intentionally formulated with restricted phthalates\*"**

## \*January 2023 Status of Reporting Requirements

Listed below are the restricted phthalates as of January 2023\*  
When we state, "This product is not intentionally formulated with restricted phthalates", we are referring to this list.

ORGANIZATION	REPORTABLE PHTHALATES
EU Toy Industry Restricted Phthalates (7)	BBP, DBP, DIBP, DOP/DEHP, DNOP, DINP, DIDP
US Toy Industry Restricted Phthalates (8, CPSIA)	BBP, DBP, DIBP, DOP/DEHP, DINP, DCHP, DNHP, DNPP
RoHS Restricted Phthalates (4)	BBP, DBP, DIBP, DOP/DEHP
REACH SVHC Restricted Phthalates (12)	BBP, DBP, DIBP, DOP/DEHP, DIHP, DCHP, DNHP, DNPP, DIPP, n-Pentyl-isopentyl Phthalate, Bis(2-methoxyethyl) Phthalate, Di(C6-C10) Phthalates
Prop 65 Phthalates requiring labeling (6)	BBP, DBP, DOP/DEHP, DINP, DIDP, DHP
EU Medical Device Regulation (12, EU MDR)	BBP, DBP, DIBP, DOP/DEHP, DCHP, DNHP, DNPP, DIPP, DHNUP, n-Pentyl-isopentyl Phthalate, Bis(2-methoxyethyl) Phthalate, Di(isoheptyl) Phthalates

\*Please confirm with Alphagary personnel that the reporting status is updated to the latest information, and the most appropriate compound(s) are recommended.

Our team is happy to provide information specific to the compound(s) of interest.
